

Configuración de Reglas Perimetrales VyOS

Este documento contiene el volcado completo de los comandos de configuración del firewall VyOS, organizados lógicamente para implementar las políticas de aislamiento de red y segmentación *Zero Trust*.

1. Grupos de Red e Inspección de Estado

Definición de la red interna crítica

```
set firewall group network-group LAN_INTERNA network '192.168.10.0/24'
```

Stateful Inspection: Permitir tráfico establecido y relacionado

```
set firewall ipv4 forward filter rule 5 action 'accept'
```

```
set firewall ipv4 forward filter rule 5 description 'Permitir tráfico establecido y relacionado'
```

```
set firewall ipv4 forward filter rule 5 state 'established'
```

```
set firewall ipv4 forward filter rule 5 state 'related'
```

2. Acceso desde el Exterior (WAN a DMZ)

```
set firewall ipv4 forward filter rule 50 action 'accept'
```

```
set firewall ipv4 forward filter rule 50 description 'Permitir Web desde WAN a DMZ'
```

```
set firewall ipv4 forward filter rule 50 destination port '80'
```

```
set firewall ipv4 forward filter rule 50 inbound-interface name 'eth0'
```

```
set firewall ipv4 forward filter rule 50 outbound-interface name 'eth3'
```

```
set firewall ipv4 forward filter rule 50 protocol 'tcp'
```

```
set firewall ipv4 forward filter rule 60 action 'accept'
```

```
set firewall ipv4 forward filter rule 60 description 'Permitir Grafana desde WAN a DMZ'
```

```
set firewall ipv4 forward filter rule 60 destination port '3000'
```

```
set firewall ipv4 forward filter rule 60 inbound-interface name 'eth0'
```

```
set firewall ipv4 forward filter rule 60 outbound-interface name 'eth3'
```

```
set firewall ipv4 forward filter rule 60 protocol 'tcp'
```

3. Políticas de la VLAN de Invitados (eth2.20)

```
set firewall ipv4 forward filter rule 100 action 'accept'
```

```
set firewall ipv4 forward filter rule 100 description 'Invitados a Internet'
```

```
set firewall ipv4 forward filter rule 100 inbound-interface name 'eth2.20'
```

```
set firewall ipv4 forward filter rule 100 outbound-interface name 'eth0'
```

```
set firewall ipv4 forward filter rule 110 action 'drop'
set firewall ipv4 forward filter rule 110 description 'Bloquear Invitados a Red Interna'
set firewall ipv4 forward filter rule 110 inbound-interface name 'eth2.20'
set firewall ipv4 forward filter rule 110 outbound-interface name 'eth1'

set firewall ipv4 forward filter rule 120 action 'drop'
set firewall ipv4 forward filter rule 120 description 'Bloquear Invitados a Reuniones'
set firewall ipv4 forward filter rule 120 inbound-interface name 'eth2.20'
set firewall ipv4 forward filter rule 120 outbound-interface name 'eth2.40'

set firewall ipv4 forward filter rule 130 action 'drop'
set firewall ipv4 forward filter rule 130 description 'Bloquear Invitados a DMZ'
set firewall ipv4 forward filter rule 130 inbound-interface name 'eth2.20'
set firewall ipv4 forward filter rule 130 outbound-interface name 'eth3'
```

4. Políticas de la VLAN de Sala de Reuniones (eth2.40)

```
set firewall ipv4 forward filter rule 200 action 'accept'
set firewall ipv4 forward filter rule 200 description 'Reuniones a Internet'
set firewall ipv4 forward filter rule 200 inbound-interface name 'eth2.40'
set firewall ipv4 forward filter rule 200 outbound-interface name 'eth0'

set firewall ipv4 forward filter rule 210 action 'drop'
set firewall ipv4 forward filter rule 210 description 'Bloquear Reuniones a Red Interna'
set firewall ipv4 forward filter rule 210 inbound-interface name 'eth2.40'
set firewall ipv4 forward filter rule 210 outbound-interface name 'eth1'

set firewall ipv4 forward filter rule 220 action 'drop'
set firewall ipv4 forward filter rule 220 description 'Bloquear Reuniones a Invitados'
set firewall ipv4 forward filter rule 220 inbound-interface name 'eth2.40'
set firewall ipv4 forward filter rule 220 outbound-interface name 'eth2.20'

set firewall ipv4 forward filter rule 230 action 'drop'
set firewall ipv4 forward filter rule 230 description 'Bloquear Reuniones a DMZ'
set firewall ipv4 forward filter rule 230 inbound-interface name 'eth2.40'
set firewall ipv4 forward filter rule 230 outbound-interface name 'eth3'
```

5. Tráfico Saliente de DMZ y Monitorización

```
set firewall ipv4 forward filter rule 300 action 'accept'
set firewall ipv4 forward filter rule 300 description 'Permitir DMZ hacia WAN'
set firewall ipv4 forward filter rule 300 inbound-interface name 'eth3'
set firewall ipv4 forward filter rule 300 outbound-interface name 'eth0'
```

```
set firewall ipv4 forward filter rule 310 action 'accept'  
set firewall ipv4 forward filter rule 310 description 'Permitir a Nagios monitorizar la LAN'  
set firewall ipv4 forward filter rule 310 inbound-interface name 'eth3'  
set firewall ipv4 forward filter rule 310 outbound-interface name 'eth1'  
  
set firewall ipv4 forward filter rule 400 action 'accept'  
set firewall ipv4 forward filter rule 400 description 'Permitir LAN enviar datos a DMZ'  
set firewall ipv4 forward filter rule 400 inbound-interface name 'eth1'  
set firewall ipv4 forward filter rule 400 outbound-interface name 'eth3'
```

6. Cadena Input (Servicios Locales)

```
set firewall ipv4 input filter rule 20 action 'accept'  
set firewall ipv4 input filter rule 20 description 'Permitir Kea DHCP'  
set firewall ipv4 input filter rule 20 destination port '67-68'  
set firewall ipv4 input filter rule 20 protocol 'udp'
```
